

CATCHING ENERGY ISLANDS SPIRIT

Samsø

A Community

Community = Common + community

A sustainable island?

3 Challenges

- Climate Change
- Security of supply
(Fossil fuels)
- Industry, economy
and jobs

New deal

- independence
- Where is my butter and bread going to come from??
- Who are "we" on Samso in 2030

EARTH FIRST!

(We'll drill the other planets later)

On behalf of the community.....

- A lot of meetings.....
- A lot of responsibility
- Very little backup
- Declining memberships
- A possible position as chair for the organisation
- A strong position for own ideas
- Access to limited resources

Ownership

*To make regional decisionmakers
able to plan for the future we need:*

- reliable policy
- brave politicians !!!!!
- longterm framework and targets
- reasonable budgets
- bankable projects
- local individual action plans – strong
community networks

Bread and butter
